PARR & CO

PARR EXCELLENCE

Engineering excellence since 1871

Engineering excellence is the cornerstone of Parr & Co

A Strong History
Established in 1871 Parr & Co has earned a reputation for quality engineering services over the years and supports a strong and diverse customer base in the South Canterbury region across the ever growing primary and secondary manufacturing sector. Demand for its services is incredibly varied but Parr & Co has the capability to meet both small one-off jobs through to major projects and breakdowns.

Our Values
Our goal is to ensure the health and safety of all our staff and clients.

We are solution driven and always looking to challenge our thinking to find new, better solutions.

We pride ourselves on our ability to deliver on our commitments and offer quality in everything we do.

We are future focused and we keep our customers' needs front of mind.

Certifications & Accreditations

Base Certifications:
- ASME/ASNZ Welding Certification
- First Aid
- Fire Extinguisher
- Confined Space
- Permit Receiver
- Heights
- EWPs
- Forklift

Accreditations:
- ISO 450001
- CPNZ
- Sitewise Gold

Fabrication

Parr & Co Limited utilises a comprehensive 1100m² fabrication/welding workshop capable of a wide range of welded fabrications. With specialist welders and equipment available at all times, Parr & Co handles difficult repair and refurbishment work as well as new fabrications.

Our range of services and equipment include:
- 1 x 5 tonne gantry crane
- 2 x 2 tonne gantry crane
- Cutting up to 2.4m long and 12mm thick
- Folding up to 3m long and 12mm thick
- Rolling up to 2.4 long and 12 mm thick
- Punching up to 35mm
- 100 tonne press
- Radial arm drill
- MIG
- TIG
- Stainless
- Aluminum
- Purge
- Certified Stick Certified
- Marine Grade Welding
- Certified ASME Welding
- Brake Pressing

No job is too big or small for the team at Parr & Co - **www.parr.co.nz**

Machine Shop

Parr & Co utilises a 400m² machine shop with well-equipped facilities for large machining jobs. Our experienced team handle a huge range of work including the manufacture of drive line components including prop shafts and couplings for fishing vessels, auger drives and stubs, the manufacture of shafts and parts used in pumps and all general machining. Parr & Co has a specialised service for overhauling pre breakers used in the freezing and meat industries and also carry stock of steel shaft in medium and high tensile that can be cut to order.

Our engineers are highly skilled in reverse engineering. In a world where equipment is quickly considered obsolete, replacement parts often become impossible to source. Parr & Co can replicate and often improve on original parts that are no longer available.

Our range of equipment includes:

- Six manual lathes
- Taper turning and taper thread cutting capability
- Manual milling
- Horizontal line borer
- Vertical slotting machine with rotary table and 180mm of stroke
- Hydraulic press up to 100 ton
- Surface grinder
- Bearing induction heater for the precise mounting of ball and roller bearings
- Radial arm drill

Preventative Maintenance

Parr & Co provides preventive maintenance services designed to keep your assets operating at peak performance. Through regular scheduled maintenance and inspections, we help minimise unplanned downtime, reduce the risk of costly equipment failures, and extend the lifespan of your plant and equipment. Our proactive approach ensures your assets remain reliable, efficient, and performing at their best.

Surveys and Inspections

Parr & Co skilled team of engineers predominantly work off-site, servicing the needs of the region's large and diverse primary and secondary manufacturers. Parr & Co has been providing some of our region's largest companies with boiler and other asset surveys for a number of years, with the information and reports gathered from this work stream supporting our customers to make informed decisions on capital and preventative maintenance budgets.

No job is too big or small for the team at Parr & Co
